

ILLUSONIC

IAP 7.1

See IAP 7.1 blog on www.illusonic.com for highlights and details.

Updating

1. Run Setup_IAP_Software.exe to update IAP Windows softwares (IAP Configuration, IAP Calibration).
2. Connect your PC to IAP USB Ctrl and run IAP Configuration software to update IAP firmware.
3. IAP Manual.pdf is the latest version of the manual.
4. Below is a brief description of features not yet described in IAP Manual.

IAP Manual Addendum

- Firmware update is now included in IAP Configuration software, simply run it and follow instructions.
- Dynamic Range is a new sound processing feature (Sound Settings Presets), to reduce dynamic range, for casual listening.
